

ITE1008 – Open Source Programming
Digital Assignment – II
Winter Semester 2020 – 2021

Topic: Website Deployment in GitHub

Git is software for tracking changes in any set of files, usually used for coordinating work among programmers collaboratively developing source code during software development. Its goals include speed, data integrity, and support for distributed, non-linear workflows. *Git* is free and open-source software distributed under GNU General Public License Version 2.

Git vs GitHub

Git is a version control system that lets you manage and keep track of your source code history. ***GitHub*** is a cloud-based hosting service that lets you manage *Git* repositories. If you have open-source projects that use *Git*, then ***GitHub*** is designed to help you better manage them

- *Create a personal webpage using HTML5, CSS and JS. Commit every change in Git.*
- *Elucidate step by step website deployment in GitHub Pages.*
- *Deploy your personal webpage in GitHub pages, share your website link, code and Screenshots.*

Submission of Assignment:

- *Due Date: May 01, 2021*
- *Must upload in GitHub and VTOP*
